Methods

All information about Gateway to College students originate from a database maintained by the National Network and submitted from program staff at 42 programs across the country. In addition, students complete self-report surveys assessing their academic experiences, perceptions, and goals at the beginning of the first term and at the end of each subsequent academic year. Information about the context and communities of our students come from a variety of public sources, including the American Community Survey (ACS), Elementary and Secondary Information System (ELSI), and the Integrated Postsecondary Education Data System (IPEDS). For more information on how these resources were used in regards to this report and other research and evaluation studies conducted by the Gateway to College National Network, contact Devora Shamah at 971-634-1203 or dshamah@gatewaytocollege.org.
